Quick Game Summary

Category	Axis 3V3 Standard
Players	3 on court + 1 substitute
Game Length	One 10-minute period
Winning	First to 21 or highest score at time
Scoring	1 point inside arc; 2 points behind arc
Overtime	First team to score 2 points
Shot Clock	12 seconds when used
Timeouts	One 30-second timeout when allowed

1. Team Format

- Each team may have up to four registered players: three players on the court and one substitute.
- A team should have at least three players ready at the scheduled game time.
- Players may compete only for the team on which they are officially registered. Unregistered players require prior Axis Sports Lab approval.

2. Game Format

- Games are played on one basket using a half court.
- Each game consists of one 10-minute period. There is no halftime.
- The clock stops for free throws, timeouts, injuries and other dead-ball situations when directed by the referee.
- The game ends when the clock expires or a team reaches 21 points, whichever happens first.

3. Scoring

- A basket made inside the arc is worth 1 point.
- A basket made behind the arc is worth 2 points.
- Each successful free throw is worth 1 point.
- The referee has final authority on whether a shot is worth one or two points.

4. Overtime

- If the score is tied at the end of regulation, teams receive a one-minute break.
- Overtime begins with a check-ball.
- The first team to score 2 points in overtime wins. Axis Sports Lab may use first-basket-wins for designated younger divisions.

5. Starting the Game

- Both teams may warm up on the same court before the game.
- A coin flip or referee-administered decision determines first possession.
- The team winning the coin flip may choose possession at the beginning of regulation or save that choice for a possible overtime.
- The game begins with a check-ball behind the arc at the top of the court.

6. What Is a Check-Ball?

- A check-ball begins the game and restarts play following most whistles or dead-ball situations.
- The offensive player stands behind the arc at the top of the court.
- The defensive player passes or bounces the ball to the offensive player.
- The offensive player must have both feet on the floor when receiving the ball. Play becomes live once the ball is received.

7. After a Made Basket

- The team that was scored on immediately gains possession.
- The ball is collected from underneath the basket and is not checked after a normal made basket.
- The new offensive team must dribble or pass the ball behind the arc before attempting to score.
- The defense may not pressure the ball inside the no-charge area directly underneath the basket.
- Teams must transition quickly and may not intentionally delay play.

8. Clearing the Ball

- After a defensive rebound, steal, block recovery or any change of possession, the new offensive team must move the ball behind the arc before shooting.
- The ball is cleared when the player controlling it has both feet completely behind the arc.
- An offensive rebound does not have to be cleared.
- A basket scored before properly clearing the ball does not count, and the opponents receive a check-ball.

9. Shot Clock and Active Play

- When a shot clock is used, the offense has 12 seconds to attempt a shot. The ball must leave the shooter's hand before time expires and then touch the rim or enter the basket.
- When no shot clock is used, teams must actively attack the basket. The referee may begin an audible five-second countdown when a team is stalling.
- Failure to attempt a legal shot before the count expires results in a turnover.

10. Substitutions

- Substitutions may take place only during a dead ball.
- The outgoing player must completely leave the court before the substitute enters.
- Substitutions take place behind the end line, opposite the basket.
- Players do not need to report to the scorer's table unless instructed by an official.

11. Timeouts

- Each team receives one 30-second timeout per game in divisions that allow timeouts.
- A timeout may be requested by a player or substitute only during a dead-ball opportunity.
- An unused timeout may carry into overtime.
- Axis Sports Lab may eliminate timeouts in younger developmental divisions to keep games moving.

12. Common Violations

- Normal basketball violations apply, including traveling, double dribbling, carrying, stepping out of bounds, three seconds in the lane, intentionally kicking the ball, failing to clear the ball and stalling.
- Most violations result in the opposing team receiving possession through a check-ball at the top of the court.

13. Fouls and Free Throws

- A foul on an unsuccessful shot from inside the arc normally results in one free throw.
- A foul on an unsuccessful shot from behind the arc normally results in two free throws.
- If the shot is made, the basket counts and the shooter receives one additional free throw.
- Before the team-foul penalty, a non-shooting foul normally results in a check-ball. Younger divisions may use a simplified foul system focused on safety and development.

14. Technical and Unsportsmanlike Conduct

- Arguing with officials, taunting, offensive language, dangerous contact, intentional delay, fighting, threats and court interference are prohibited.
- Penalties may include a warning, free throws, loss of possession, removal from the game, suspension or removal from the league without refund.
- Any act of violence or serious aggression may result in immediate disqualification.

15. Coaches and Parents

- Coaches must remain in the designated area and may not enter the court without permission.
- Parents and spectators may encourage athletes but may not coach from the sideline or interfere with play.
- Parents may not approach, threaten, follow or argue with referees, players, coaches or league staff.
- Only the designated team representative may respectfully request clarification. Judgment calls are final.

16. Playing Time

- Axis Sports Lab's goal is meaningful participation and athlete development.
- Coaches should make a reasonable effort to provide every athlete with playing opportunities.
- Playing time may be affected by attendance, injury, effort, sportsmanship or disciplinary issues.
- Equal playing time is encouraged but not guaranteed during championship or elimination games unless stated for the division.

17. Uniforms and Player Safety

- Players must wear the approved league jersey or uniform, athletic shorts and basketball shoes.
- Jewelry must be removed. Fingernails should be trimmed, and hard or dangerous equipment is not allowed.
- Approved braces or protective devices must be safely covered.
- A player who is bleeding or has an open wound must leave the game until the bleeding stops and the area is securely covered.

18. Injuries

- Referees may stop play immediately for a serious injury.
- Parents and coaches must wait for permission before entering the court unless emergency assistance is clearly required.
- Axis Sports Lab staff may prevent an athlete from returning when continued participation appears unsafe.
- Parents are responsible for notifying Axis Sports Lab about medical restrictions or conditions affecting participation.

19. Late Arrival and Forfeits

- Teams should arrive at least 15 minutes before game time.
- A team should have three players ready when its game is scheduled to begin.
- Axis Sports Lab may provide a short grace period when the schedule allows.
- Repeated no-shows may result in removal from the schedule or league. A scrimmage may still be permitted after a forfeit at staff discretion.

20. Final Authority

- Axis Sports Lab may adjust rules by age group, skill level, safety needs, facility conditions or developmental goals.
- Referees and league officials have final authority over rule interpretations, player eligibility, game administration, safety decisions, discipline and situations not specifically addressed.
- By registering, all players, parents, spectators and coaches agree to support a safe, positive and respectful environment.

SPORTSMANSHIP COMES FIRST

Respect teammates, opponents, referees, coaches and the facility at all times.

Rules adapted for Axis Sports Lab youth competition from the Official FIBA 3x3 Basketball Rules. Axis Sports Lab league policies control where a youth-specific modification is stated.
